Project

Panasonic Employee Portal

Business

Panasonic Malaysia Sdn Bhd is a sales, service and marketing company for the Panasonic brand of electrical and electronic consumer products ranging from home appliances, audio-visual, digital cameras, air conditioners, business systems and solutions, telecommunications, professional broadcasting cameras, health and beauty care to batteries and lightings. Panasonic Corporation based in Osaka, Japan is a worldwide leader in the development and manufacture of electronic products for a wide range of consumer, business, and industrial needs.

Requirements

➢ Provide employees a collaborative working environment for sharing information and exchanging views
➢ Allow users to manage, aggregate and publish contents or applications with minimal IT personnel intervention
➢ Provide the employee directory with search function for easy retrieval of employee contacts.
➢ Allow anonymous users to drop messages to a specific email address.
➢ Allow displaying of content title listings under parent category or child category on users' preference.

Solution & Technologies

Panasonic Employee Portal (PEP) is an employee portal which delivers informative and collaborative working environment using Liferay Portal. Liferay Portal is an open source enterprise portal solution using Java technology which offers integrated web publishing and content management, an enterprise service bus and service oriented architecture. Liferay Portal provides a set of out-of-the-box tools for use in the work environment.

The deployed solution contains the following applications:
➢ **Liferay Portal**: is a unified web interface that provides access to contents and applications.
➢ **Liferay Content Management System**: let users manage and aggregate contents in the portal. WYSIWYG editor allow users to create or edit contents easily. Document Library and Image Gallery are provided to store documents and images.
➢ **Liferay Collaboration**: let users interact with each other in the work environment to allow information sharing. Examples of usable application are Blogs, Polls, Shared Calendar, etc.

Results

➢ The PEP delivers a powerful set of features for users to aggregate contents and applications from various to the portal rapidly.
➢ PEP provides employees with quick access and accurate information. It also helps employees in decision making and also improves work efficiency.
➢ Collaborative working environment promotes productive discussion, consensus decision making and employee unity.
